

IEEE DTU
Student Branch

VIHAAN 4.0

About Us

IEEE is the world's largest technical professional organization dedicated to advancing technology for the benefit of humanity. It is strongly committed to diversity, equity, and inclusion and its core purpose are to foster technological innovation and excellence for the benefit of humanity.

IEEE DTU has emerged as the most active and prolific student organization in the last 35 years with over 400 active members.

By actively organizing seminars, SIGs, and workshops in various domains of STEM, we aim to provide our members with extensive opportunities.

Vihaan is an annual hackathon event organized by IEEE DTU, it encourages students to pursue their careers in engineering fields. With Vihaan, we aim to uplift talent from underrepresented communities and bridge the gap caused by gender inequalities. This hackathon is a 24-hour event and it provides a platform for budding programmers to come up with a solution to the world's existing problems with the help of technology. Here, students can participate in teams of up to 4 members.
